

The Risk Pooling Trust is offering the “**Roadwise Review.**” This Free CD-Rom product was developed by AAA to help seniors drive safely, longer. This easy-to-use CD-Rom can help your drivers with the following:

- Identify health and fitness issues that affect their driving by enabling you to check visual, mental and physical responses
- Identify steps to reduce their risk behind the wheel.
- Talk with their doctor about how to maintain your fitness to drive.
- Monitor their driving health in privacy.
- Provide them with a summary report of their scores and give them suggestions on how to improve.

Roadwise Review gives the driver the information they need to take responsibility for their driving decisions and maintain their fitness behind the wheel. This program requires two individuals to take the tests. At least one of the individuals should have knowledge on how to use the computer. I would suggest you run through the program yourself to see if it would be something you can use. This CD-Rom is free and can be sent out by contacting Christian Brothers Services at 800-807-0300 *3054.

There is only one requirement we have for the using this program. We would appreciate a summary of your feedback as to whether it is a useful product for you and your Order. Feel free to call/email/send your feedback after you are through. Also, this CD- Rom is yours. It can be used from home to home. Bottom line, you can use it as many times as you choose.
