

Welcome to Christian Brothers Risk Pooling Trust Automobile Risk Management Survey.

Our role at Christian Brothers Risk Management Services is to help you protect your assets, covered by the Risk Pooling Trust. Since 1979 the Risk Pooling Trust has provided training, education and risk control consultation to thousands of Catholic organizations. Over the years, we have compiled information on the best practices for handling and preventing the risks related to automobile transportation.

Understanding your risk and knowing what to do is the first step in controlling losses. **The Fleet Tool Kit: Safety Management of Your Drivers and Their Vehicles** was developed to manage the risks, concerns and challenges related to transportation. This valuable resource includes sample forms, policies, procedures and information that you will be able to adopt and customize for your organization.

The Fleet Tool Kit comprehensive survey helps you measure your current efforts and fine tune your practices. Begin the survey by simply answering the questions. The survey will help you determine those areas where you can improve your current vehicle safety program and will provide you with the standards and best practices which will help you in strengthening your program.

ACKNOWLEDGEMENTS

This manual was made possible by the efforts of the following talented and dedicated people:
